Seminar Instructor

Anne Hogan, a developmental psychologist, directs the Harris Institute for Infant Mental Health Training at the FSU Center for Prevention & Early Intervention Policy. Since completing her doctorate at the University of Miami, she has worked at the University of Denver, the University of Miami School of Medicine, the University of Wisconsin-Madison, the University of Hawaii, and FSU. Her research has included strategies to assess of social-emotional development in high-risk children. She coordinates training of IMH therapists around the state, and she has provided IMH training to many audiences, including home visitors, child welfare professionals, early interventionists, and maternal and child health professionals. She has presented at regional and national conferences, and works at the FSU Center on IMH training, curriculum and assessment development.

Learning Objectives

Day 1

1. Participants will increase their awareness of Florida's IMH efforts, and the development of IMH competencies.
2. Participants will increase their awareness of definitions of IMH and how the DC:0-3R multi-axial system links to different features of those definitions.
3. Participants will update their knowledge of development in young children.
4. Participants will update their knowledge of the development of attachment relationships and important timelines and transitions.

Day 2

1. Participants will enhance their skills in observing and describing infant development and infant-parent interactions.
2. Participants will increase their knowledge of general principles in IMH interventions.
3. Participants will increase their familiarity with major IMH treatment models and their key features.
4. Participants will increase their knowledge of major findings regarding the impacts of IMH treatment models and the relevance of the IMH evidence base for their work.

*Please note this is NOT a training on the DC:0-3R which requires a minimum of a full day. Attending this workshop would not be sufficient training to use the system for diagnostic purposes.

Seminar Description

This seminar will provide an overview of the major concepts, practice, and interventions in the field of Infant Mental Health. Participants will be introduced to the DC:0-3R, update their knowledge of early development, enhance their observation skills, and learn about well-known IMH interventions and their effectiveness.
